

HEAT PROTECTION FOIL - REDUCES HEAT LOSS AND SAVES MONEY!

YOUR BENEFIT

- Reduction of heat loss, energy saving, climate protection in the operation of biogas storage tanks
- Patented system

ADVANTAGE (FOR GAS STORAGE ON DIGESTER AND POST-DIGESTER):

- Reduction of the heating energy requirement
- More precise adherence to fermentation temperature
- Compensation for non sufficient heating system
- Capping the peak demand during frost days
- Other possible uses for the heat saved
- Compensation for the decreasing heating capacity of the built-in heaters over time (blocked pipes, silting up of the digesters ...)

AMORTISATION
often possible
within one year
